FASTENINGS

TOGETHER WE'RE BUILDING NEW ZEALAND

PlaceMakers is New Zealand's leading and largest supplier of building materials and hardware. We're 100% committed to our customers, and assist over 300,000 of them.

We have 60 stores, from Kaitia to Invercargill. We sell over 74,000 product lines from concrete to paint to fastenings. We manufacture frames and trusses from 8 manufacturing plants nationwide.

We can offer you a large and comprehensive fastenings & fixings range, including many specialty and special order items.

We only sell quality fastenings applicable to New Zealand conditions and we are constantly seeking and updating our range with the latest ideas and innovations. We stock reputable brands that the Trade know and trust and we have the know-how technical expertise to meet your project needs.

We know a thing or two about Fastenings!™

Screw Drive Types

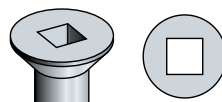

Torx is a tough drive type, the star shape strongly grips the driver bit to help prevent stripped heads. Torx comes in different sizes depending on the size of the screw head, T15 for the smallest to T40 for big screws. Torx is a decorative finish and is used mainly in decking and landscape screws.

Best

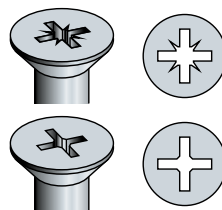

Internal Hex is a powerful drive type used in big diameter batten and landscape screws. The hex shape is heavy-duty and can take a battering from impact drivers.

Better

Square is the foremost drive type sold in NZ, square significantly reduces rounding-out of the drive by the driver bit compared with Pozi & Phillips screws. 3 square sizes (#1, #2 & #3), #2 square being the main volume size.

Pozi & Phillips head screws can be easily rounded out with worn driver bits or using too much torque on the screwdriver, making the square drive screw a stronger choice.

Good

Corrosion Resistance

Best

Stainless Steel grade T316 – for the highest corrosion resistance and is suitable for outdoor use in coastal areas and extreme conditions.

Stainless Steel grade T304 – for very good corrosion resistance and is suitable for most outdoor applications exposed to the elements, use T316 grade for coastal.

B8 – is a hardwearing corrosion protection that is better performing than standard galvanised fastenings, for outdoor landscape projects using heavy duty timber screws and used in roofing screws.

Class 4 Galvanised – is a galvanised coating over the metal fastener and is a minimum corrosion protection for outdoor applications.

Good

Zinc – offers the minimum amount of corrosion protection and is intended for interior applications.

COUNTERSUNK TRUSS HEAD

Used where a flush finish is needed e.g. in timber or in a pre-countersunk fitting such as a shelf bracket.

Suitable applications may include:

- Hardwood to softwood
- Hardwood decking applications
- Timber framing
- Flooring systems
- Cladding
- Fencing
- Builders brackets

For use in
Category
5 Corrosive
Environments

Available in plastic
trade packs with sliding lid

Locks materials together

UNIQUE THREAD DESIGN
Engineered to fasten multiple materials with ease

HIGH TECH DRILL TIP
Drills a perfect sized hole

CONTOUR HEAD

Used when broad holding power &/or a decorative look is required. The underside of the head is flat & ideal for fixing sheet materials or heavier timbers.

Suitable applications may include:

- Hardwood to softwood
- Sheds & metal fencing
- Cladding & screening
- External fittings such as wall brackets, garden hose reels etc.
- Aluminium signs

For use in
Category
5 Corrosive
Environments

Also available

CONSTRUCTION
SCREW***For fastening heavy timber to timber*

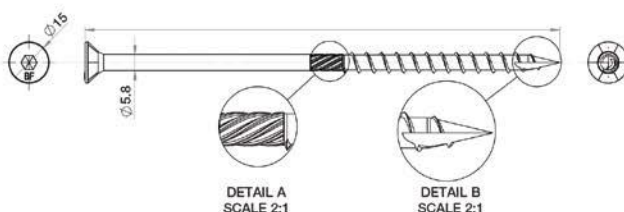

GAUGE	LENGTH	DRIVE
14G	75mm	T30 Torx
14G	100mm	T30 Torx

- **T30 Torx Drive Washer Head**
Broad holding power means materials are brought together and held in position, resisting warp and head pull through. Larger surface area for positive bit engagement and extreme torque.
- **Sharks Tooth™ Thread**
Provides an aggressive cutting action, dramatically decreasing installation time.
- **B8 Coating**
Provides maximum corrosion protection in the harshest environments.

**HEAVY DUTY
CONSTRUCTION
SCREW***For heavy duty fastening timber to timber*

GAUGE	LENGTH	DRIVE
16G	125mm	T40 Torx
16G	150mm	T40 Torx
16G	175mm	T40 Torx
16G	200mm	T40 Torx

- **T40 Torx Drive Washer Head**
Broad holding power means materials are brought together and held in position, resisting warp and head pull through. Larger surface area for positive bit engagement and extreme torque.
- **7 TPI Thread with Swarf Channel**
Penetrates large material easily. Provides maximum friction resistance and protection in wet environments.
- **Technoguard Zinc Rich Alu-Flake Polymer Coating**
Multi-layered Class 3 protective coating, compatible for use in treated timbers.

**HEAVY DUTY
LANDSCAPING
SCREW***For heavy duty fastening timber to timber*

GAUGE	LENGTH	DRIVE
14G	175mm	Hex 6mm
14G	200mm	Hex 6mm
16G	225mm	Hex 6mm
16G	250mm	Hex 6mm

- **Hex Drive Countersunk Head**
For a flush finish.
- **Knurled Shank and Swarf Channel**
Helps prevent board lift and removes debris for faster drilling.
- **Technoguard Zinc Rich Alu-Flake Polymer Coating**
Multi-layered Class 3 protective coating, compatible for use in treated timbers.

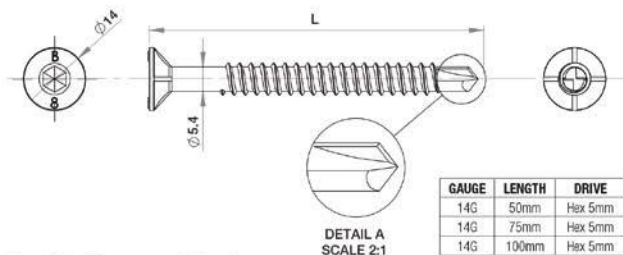

CONSTRUCTION SCREWS

METAL DRILLING BATTEN SCREW

For medium duty fastening timber to metal batten

- Hex Drive Countersunk Head**

Matches the standard bugle batten range with a flush finish for fixing timber to metal.

- Self Drilling Tip**

Fasten to metal up to 5mm thick.

- B8 Coating**

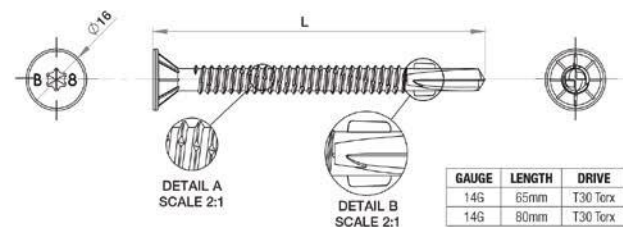

Provides maximum corrosion protection in the harshest environments.

WINGED DEEP DRILLER – METAL

For heavy duty fastening timber to Lintels and I beams

- T30 Torx Drive and Truss Head**

Broad holding power means materials are brought together and held in position, resisting warp and head pull through. Positive bit engagement allowing for maximum torque to be applied.

- 14 TPI Thread with Swarf Channel and Winged Deep Driller**

For deep drilling into steel up to 12.5mm thick, no need to pre-drill.

- B8 Coating**

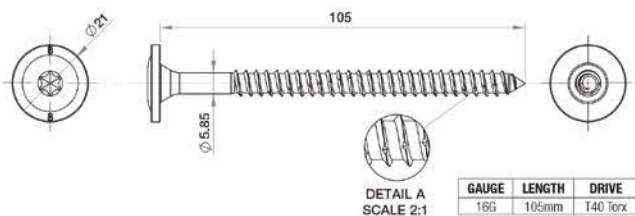

Provides maximum corrosion protection in the harshest environments.

HEAVY DUTY CONCRETE SCREW

For heavy duty fastening bottom plate and timber to concrete slab

- T40 Torx Drive Washer Head**

Broad holding power means materials are brought together and held in position, resisting warp and head pull through. Larger surface area for positive bit engagement and extreme torque.

- 10 TPI Thread**

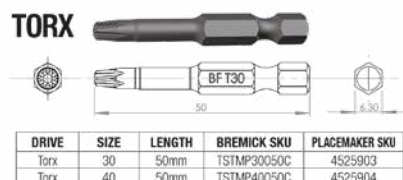

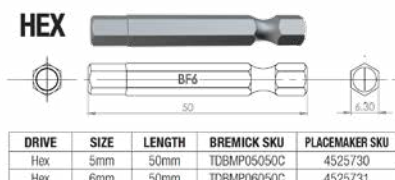

For deep penetration into concrete. Pre-drill hole of 6mm required.

- B8 Coating**

Provides maximum corrosion protection in moist areas.

SYSTEM MATCHED DRIVER BITS

Bremick genuine driver bits are system matched for optimum performance when installing the FixConn™ range of construction fasteners. Our driver bits are manufactured to conform to international standard specifications, providing the best possible internal recess fit.

SUPERIOR COATING TECHNOLOGY

B8™ COATING
Double the corrosion protection of conventional Class 4 in category 5 environments

TECHNOGUARD COATING
Multi-layered Class 3 protective coating, compatible for use in treated timbers

QUALITY TESTED AND ASSURED

The Bremick FixConn™ range of construction screws has undergone rigorous testing to ensure compliance with the relevant Standards. These testing procedures ensure product suitability for the harsh Australian and New Zealand building construction environments. Testing is undertaken in our own NATA accredited laboratory and independently audited outdoor exposure test sites.

Revolution Coating Protection for extreme corrosive environments

Superior engineering and finish makes B8 coating the smart choice for your self drilling screw needs.

30%

**FASTER
DRILLING**
Than conventional Class 4

8X TOUGHER

Than conventional Class 4 Extremely abrasion resistant. Minimal coating loss during installation.

2X PROTECTION

Double the Corrosion protection of conventional Class 4 in category 5 environments Suitable for Very Severe corrosive environments (ISO 9223 Category 5).

WARRANTY

Fully warranted for ISO Category 5 Very Severe Environments.

COMPATIBILITY

COLOURBOND® Ultra Steel, ZINCALUME®, COLOURBOND® and Galvanized and Zinc coated products. ACQ and CCQ treated timber.

APPEARANCE

Smoother, finer & matched to ZINCALUME®.

CONFORMANCE

Exceeds AS 3566 Class 4.

EDGE DECK FASTENING SYSTEM

Changing the face of decking

Tools

CAMO Marksman PRO series

- Heavy-duty, contractor-grade tool.
- Clamping action grips deck board.
- Dual screw guides fasten both sides of board with single tool placement.
- Automatic deckboard spacing.
- 3.2mm spacer available separately.

SET

POSITION

LOAD

FASTEN

The first hidden deck fastening system to easily & affordably attach pine, hardwood & composite deck boards directly to the substructure.

Accessories

Driver Bits

- CAMO Driver Bits are engineered specifically for use with the CAMO Hidden Deck Fastening System. The built-in shoulder sets automatic depth of drive for maximum holding power, and prevents over-driving the screw.
- Driver Bit – for use with solid, ungrooved deck boards.
- Grooved Board Driver Bit – with higher shoulder for deeper penetration when using grooved deck boards.

Spacer

- Camo 3.2mm Spacer for accurate spacing where a narrower gap is preferred.

Pre-Drill Bit

- Camo Pre-Drill Bit for split free fastening (recommended on hardwood).

With Nurajacks, low profile decks have never been easier... jobs that were once time-consuming and complicated now run smoothly with efficiency & ease.

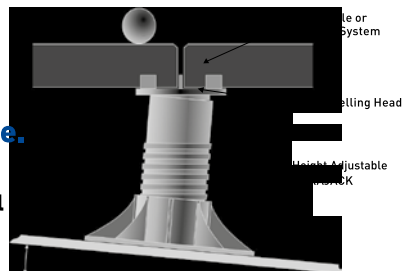

Our patented system means you can trust that your deck will be level and will meet Building Code & Council Standards.

Nurajacks are height adjustable. They allow the tiles or decking to be raised up to the level of the interior living space. This creates a level threshold with optimum indoor-outdoor flow.

When installing over waterproofing membrane, tiles and decking should be removable to allow access to the membrane below the surface. Your ultimate solution to achieve this is using Nurajacks and Nurapads.

Laying a floor or deck with Nurajacks is easy. The Nurajacks rest on top of the substrate and the tiles or decking timber sit on the self-levelling head of the Nurajack. The void between the decking and the substrate can be used to accommodate pipes and other

See page 97

services. The Nurajack system does not use grout or adhesives.

When it rains the water flows between the tiles and decking, onto the substrate and then unimpeded onto drainage. The Nurajack system protects waterproof membranes from foot traffic and harsh UV sunlight so that it can keep your home dry.

Adding the Nurajack SE Acoustic Pad is a cost-effective way to enhance the acoustic reduction properties of the system.

NURAJACK
DECKING MADE EASY

DECKTEC™

See page 98

Perfect every time.

Complete your project quickly, saving time and money.

Decktec's systems unique features:

Lightweight and durable, Decktec Decking Strips are manufactured with easily removed spacers and fixed spacers with 1mm ridges able to penetrate timber with lateral expansion in damp and humid conditions.

1. Removable Spacer *

- Lay boards either side in pairs for a perfect deck
- Offset spacers will compress with oversize boards
- Open centres for string line or laser
- Easily removed on completion

2. Fixed Spacer *

- 1mm triangular ridges allow for lateral timber expansion
- Tested to 1200KPa
- Holds bowed boards and maintains straightness

3. Recessed Fixing Points

- Clouts finish flush
- Will not foul decking screws

4. Winged Edges

- Deflects water & grime
- Protects the joist

*Spacers are 5mm thick for 86mm & 90mm strips; 6mm thick for 140mm

15kN PERIMETER BRACING SOLUTIONS

SESTO

ICCONS® ThunderBolt®Pro with 50x50x3mm Galvanised Washer

ICCONS®

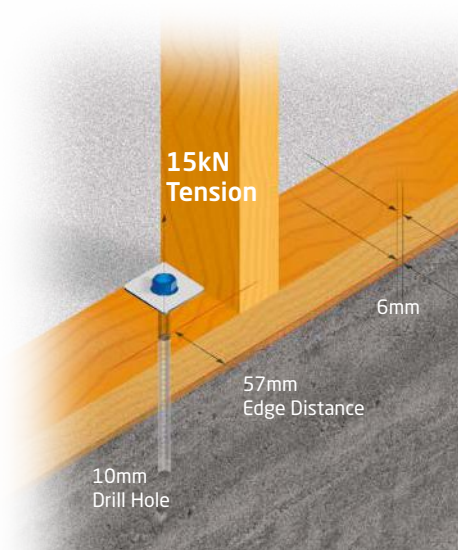

FORMED CONCRETE BRACING SOLUTION

The ICCONS® ThunderBolt®Pro is the latest design in high performance screw-in, self tapping concrete anchors for use in a wide range of concrete and masonry base materials. The ICCONS® ThunderBolt®Pro achieves high loads while generating low expansion forces making it ideal for close to edge applications. Available in a mechanically galvanised finish, the The ThunderBolt®Pro is the perfect solution for use as a perimeter fixing in accordance with NZ Building Code clauses E2 and E3.

BRACING SYSTEM - PROPRIETARY SOLUTION

The SXTB10140G, SXTB10150G and SXTB10200G ThunderBolt®Pro anchors have been independently tested and achieved a characteristic tie down load of 15kN (minimum) in 20 MPa concrete. The SXTB10140G, SXTB10150G and SXTB10200G ThunderBolt®Pro anchors are suitable for use as proprietary bracing solution complying with NZ Building Code clauses E2 and E3.

 information about
 the SL125 Green

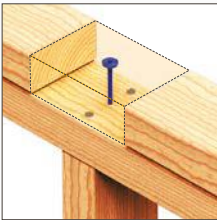

StudLok™

More than just a screw

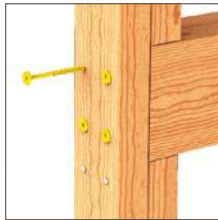

STUDLOK™ STRUCTURAL FASTENERS HAVE BEEN SPECIFICALLY DEVELOPED TO PROVIDE EASY ALTERNATIVE OPTIONS FOR NZS 3604:2011 AND FORM AN INTEGRAL PART OF THE MITEK® TRUSS AND FRAME DESIGN LAYOUT.

4512031 BLUE

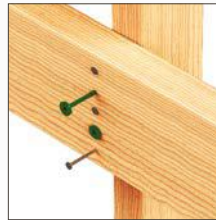

For on-site use when fixing top plate to studs as per Section 8 NZS 3604:2011.

4512044 YELLOW

Installed by MiTek® Frame and Truss fabricators as an alternative option for top plate to studs and lintel fixings.

4512035 GREEN

Suitable for use when fixing stringers to studs. See the StudLok™ Stringer to Stud Fixing Schedule for more detail.

COMING SOON WHITE

For use when purlins need to be on their edge or providing solutions to specific engineered design scabbing of trusses.

SEALANTS FOR ALL TRADES

JOINT SEALANT APPLICATION / SUBSTRATE

	Sikaflex AT-Façade	Sikaflex Construction AP	Sikaflex MS	Sika Crystal Clear MS	Sikaflex-11 FC	Sika BlackSeal-1	Sikasil General Purpose	Sikasil Roofing & Plumbing	Sikasil Wet Areas	Sikasil C (NZ)	Sikasil N	Sikasil NG	Sikasil RTV	Sikasil Pool	Sika Fiferate	Sika FastGaps 20 Mins
Aquariums (clear only)																
Bathrooms - Clear sealant for shower screens, sinks, basins																
Bathrooms - wet areas - toilets, kitchens, laundries																
Bitumen - roofing & tanking membranes, felt roofs, around penetrations																
Bitumen - based joint sealant																
BRANZ Appraised																
Cladding - aluminium panels																
Clear sealing - shower screens, sinks, basins																
Clear sealing - brick, timber, metal, glass, ceramics, masonry																
Coloursteel - butt/lap joints (approved by New Zealand Steel)																
Common building materials (brick, metal, concrete, wood, pvc, etc)																
Concrete - floor joints, saw cuts (>18 mths old)																
Concrete - vertical joint sealing																
Crack and gap filler - plaster, timber, etc																
Façade sealant - aluminium cladding panels																
Façade sealant - aluminium joinery																
Façade sealant - concrete precast panels																
Façade sealant - high performance areas																
Fire rated sealant (indoor only)																
Floor joints - concrete movement joints (>18mths old)																
Glass sealing - glazing																
Hygiene areas (FSA approved)																
Kitchens - wet areas - laundries																
Plastic - acrylic bathroomware																
Plastic - laminated																
PVC (rigid)																
Refrigerated panels, coolrooms																
Roofing - bitumen based joints & repairs																
Roofing - general sealing																
Roofing - gutters, flashings, lap joints, skylights																
Showers - plastic wall linings																
Showers - wall linings - Hardiglaze, Duracryl, Seratone Silverseal																
Stone - granite, marble, Hinuera or Damaru																
Swimming pools - underwater joints																
Underwater joints - drinking water, storm water																
Vents, ducting, air conditioners, roofing																
Waterproof joints																
Wet areas - bathrooms, toilets, kitchens, laundries																
Windows / doors - aluminium joinery																

For specific advice contact Sika on 0800 745 269. Always refer to the latest product data sheet available on www.sika.co.nz before use.
