

Learner Self-reflection – 12935 (v5) Construct a spaced residential timber deck up to one metre high as a BCATS project

Student name:

1. Why should you use string lines when setting out pile positions?

2. If a pile needs to be cut to length, which end should go in the ground?

3. What are the benefits of laying decking:

a) Smooth side up?

b) Grooved side up?

4. What type of nails should be used to fix 21mm decking exposed to the weather?
