

Learner Self-reflection 6 – 24350 (v3) Identify, select, use and maintain portable power tools for BCATS projects

Student name:

- 1 What are the different methods for collecting dust when using electric sanders?

- 2 What will happen if you put too much pressure on a sander?

- 3 Why should you lay the sander on its side when you have finished sanding?

- 4 What are the potential hazards when using an angle grinder near thinners, rags and other flammable materials?

- 5 When operating an angle grinder, what steps can be taken to manage or control the effects of sparks on other people?

- 6 What are the dangers of using excessive force on the disc when using an angle grinder?

- 7 Why is it necessary never to apply pressure to the side of cutting discs (side loading) when operating an angle grinder?
