Assessment: Generic project

Learner instructions

This assessment is about using trade skills, without being prompted, to create a high-quality level 2 BCATS project.

You need to show you can:

- prepare a detailed cutting and materials list
- complete the project with a high standard of finish.

The standard will not be signed off until you have completed the project.
The project must be different to any other level 2 project you have completed in your current course of study.

Your teacher will observe you working throughout your project.
They will provide comments in this assessment resource as evidence to support their observations.

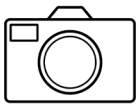

You will need to provide the following evidence to support this. Submit it using myBCITO or the process at your school/organisation.

Completed *Cutting list* and *Materials list* templates.

A completed *Project record* template, showing the tasks and quality checks you carried out, feedback you received, and any changes you made.

Note: If you have completed the assessment activities for Skill Standard 40558 (Plan and monitor the completion of a BCATS project – Level 2, 6 credits), you do not need to complete the project record again.

Photos that clearly show the finish and detail on the completed project.

It is a good idea to use the assessment checklist in this assessment resource to keep track of the evidence you have collected.

The grade you are awarded will be based on your ability to complete the project with a high standard of finish.
